Prepare for your remodel with these helpful tips.

What to consider for your re-side

- ☐ Don't just cover up an existing problem.
To fix a damaged exterior, always completely remove the old siding.
- ☐ Have your home inspected for moisture damage, mold, termites and rot. If any of these are found, address the problem to avoid future structural issues.
- ☐ Your contractor should apply a weather-resistant barrier such as HardieWrap® weather barrier. In fact, most building codes now require this.
- ☐ Be sure your new siding is installed according to the manufacturer's instructions for optimal product performance.

What to consider for your contractor

- ☐ Make sure the contractor's proposal includes everything you requested and the price is based on the entire project, start to finish.
- ☐ Focus on value rather than price – the credentials, attention to detail and provisions for maintaining a safe and tidy workspace.
- ☐ Carefully read the contractor's workmanship warranty policy.
- ☐ Remember, a proposal is not a contract. Once you get a written contract, compare it to the proposal to ensure all your needs are met.

**HARDIE®
SIDING**

**VINYL
SIDING**

VS.

Resists Weather

Hardie® siding

Resists damage from wind, rain, freezing temperatures and hail.

Vinyl siding

Can be damaged by hail and more prone to cracks, buckling or warping with extreme temperature changes.

VS.

Resists Heat

Hardie® siding

Noncombustible and resists damage from extreme heat.

Vinyl siding

Vulnerable to melting caused by flame, grills and Low-E windows.

VS.

Hours of UV
light exposure

Resists Discoloration

Hardie® siding

ColorPlus® Technology finishes are baked onto the boards, creating consistent color that performs better and looks brighter on homes.

Vinyl siding

Color stability varies with product quality, which can affect susceptibility to color change.

*The images illustrate samples of HardiePlank® lap siding, both unexposed (left) and exposed (right) to repeated cycles of wetting and drying. Image of vinyl siding illustrates potential damage from hail or other impact. **The images represent HardiePlank® lap siding sample exposed to a blowtorch flame for 90 seconds, and a vinyl siding sample heated to 140°F for 30 seconds. †Within a controlled lab environment, samples were exposed to an accelerated QUV test of 2,000 hours under ASTM G154-12a.

Long-lasting protection that vinyl siding can't match.

When investing in your home, don't be misled by vinyl siding's short-term cost. Its color can be more susceptible to fading. Vinyl siding may also crack, buckle or sag with weather stress and time, diminishing your home's value.

HardiePlank® Lap Siding Smooth Mountain Sage
HardieTrim® Boards Smooth Khaki Brown

**HARDIE®
SIDING**

**WOOD-BASED
SIDING**

VS.

Resists Weather

Hardie® siding

Resists shrinking, swelling and cracking in changing weather.

Wood-based siding

Shrinks and swells more with changes in moisture and humidity.

VS.

Resists Fire

Hardie® siding

Won't burn and is recognized by fire departments nationwide.†

Wood-based siding

Will burn when exposed to a significant source of heat or flame.

VS.

Resists Pests

Hardie® siding

Won't be eaten by woodpeckers or other pests.

Wood-based siding

Subject to damage from woodpeckers and other pests.

*The images illustrate HardiePlank® lap siding and woodbased siding samples, both unexposed (left) and exposed (right) to repeated cycles of wetting and drying. **The images represent HardiePlank® lap siding and wood-based siding samples exposed to a blowtorch flame for 90 seconds. †Hardie® siding complies with ASTM E136 as a noncombustible cladding and is recognized by fire departments across the U.S., including Marietta, GA, Flagstaff, AZ, and Orange County, CA. ‡Images depict undamaged HardiePlank® lap siding and wood-based siding exhibiting woodpecker damage.

Natural look of cedar with supernatural performance.

James Hardie designs every fiber cement board to resist swelling, buckling, warping and splitting, no matter what nature brings. No wood, wood-based, vinyl or other fiber cement siding can match our overall ability to protect your home's exterior from the elements.

HardiePlank® Lap Siding Smooth Night Gray
HardieTrim® Boards Smooth Arctic White

Nothing is ever finished until it's finished.

Our controlled process delivers a more consistent finish that performs better with less maintenance. And with our 15-year limited finish warranty, you can enjoy the peace of mind that comes from a style that endures.

Exceptional finish adhesion

Our proprietary coating is applied to the surface and edges of our boards for durable performance.

Superior color retention

Our ColorPlus® Technology finish is baked onto Hardie® fiber cement products, enhancing resistance to peeling and chipping.

Superior UV resistance

Our ColorPlus® Technology finish retains vibrancy longer when compared to vinyl siding and typical field paints on other siding products.

Built to perform beautifully here, there, or anywhere.

Only Hardie® fiber cement siding and trim are specifically designed to perform beautifully wherever you live. Our products resist shrinking, swelling and cracking, even after years of wet or freezing conditions, and they stand up to hot, humid conditions, blistering sun and more.

Unlike other brands, James Hardie doesn't prorate its siding warranties.

30-year non-prorated, limited siding warranty

#1 Brand
of Siding

Bring your timeless design to life.

When picking the siding style for your home, there are a few things you should always keep in mind:

- 1 **Your home is an extension of you.** Choose exterior materials and designs that reflect your lifestyle.
- 2 **Think about the climate where you live.** Our fiber cement siding is a better all-around performer than wood-based or vinyl siding, delivering exceptional resistance to weather, fire and damage from pests.
- 3 **Take a long-term view of your investment.** Weighing costs? Re-siding your home with fiber cement siding provides the #1 return on investment of any major exterior remodeling projects.*
- 4 **Choose colors that complement your personality.** Find colors that complement your home's setting and your personality. No other siding brand matches our combination of styles, textures and color finishes to capture the design you desire.
- 5 **Add the perfect finishing touch.** The trim, soffit and fascia will complete your home's exterior, giving it instant curb appeal.

"As we started looking at the house, we thought, well, maybe we should re-side it. Now I think it reflects more what's on the inside of our house. It looks like a different house—it looks like a new house."

Lisa and Mike H. used Hardie® fiber cement products to re-side their home.
